Web Accessibility, Web Standards, and 508 Compliance

As many sites today have accessibility barriers, our web applications are constructed to adhere to standards and pursue best practices

Web Accessibility

Web Accessibility enables people with disabilities (visual, auditory, physical, speech, cognitive, and neurological) the ability to effectively use the web.

Section 508 Compliance

Section 508 Compliant Sites adhere to the Rehabilitation Act of 1973 (further enforced by the Workforce Investment Act of 1998), requiring electronic and information technology developed, procured, maintained, or used by the Federal Government to be accessible to people with disabilities.

Web Standards

Web Standards are formal standards and technical specifications that define and describe aspects of the web.

Right now....today....GeoNorth is using hot new development techniques with slick interfaces that are all about rich internet application development. With GeoNorth's proven and vetted techniques, Our Web Accessible sites conform to Section 508, Web Standards, and Web Accessibility Initiative (WAI) guidelines.

GeoNorth is experienced in all accessibility and compliance issues.....and we can help! We are experts at producing accessible, compliant, rich internet applications. And, we're 8(a).
