

Your website... your newly anticipated marketing tool... is done! It's been launched, and the feedback has been great. As time goes by though, things change. And as change occurs, you realize that adjustments need to be made to the content of your website. Do you have to call your site developer, wait for them to make time for you, and then pay them?

Not with the new...

GeoNorth   
**Content Management Systems**

So, what is Drupal? It's the power to connect! It's:

- Powerful
- Scalable
- And has thousands of modules available to expand with
- Flexible
- Extensible
- Stable
- Reliable
- Secure
- Configurable

Drupal is widely popular because it provides a powerful, scalable, low/cost/high value solution to manage and grow an Internet presence. Drupal is open-source technology, meaning the code is freely available to anyone to use and modify. The free and open-source code also means no licensing fees, and no vendor lock in.
